1. SUMMARY

An Initial Site Assessment (ISA) was conducted for the Fulkerth Road/State Route 99 Interchange Project. The project site incorporates the southbound off-and on-ramps of State Route (SR) 99 at Fulkerth Road, a section of Fulkerth Road Road, as well as Stanislaus County Assessors Parcel Numbers (APNs) 088-010-019 and 089-019-019 and a portion of 089-020-019 within the City of Turlock in Stanislaus County, California (site).

The site consists of approximately ten acres of vacant land. Irrigation features were noted at the eastern edge of the southernmost parcel. Fulkerth Road runs through the site from east to west, near the center. SR99 borders the site to the east. No additional uses of the site were noted during our assessment.

The site has been used for agricultural purposes, such as field crops, since at least 1937. Structures have also been located at the site from at least the 1937 until 1987. SR 99 was constructed through the site between 1969 and 1972. No USTs or hazardous materials releases were reported at the site. No other land use has been reported.

The Joe Gomes & Sons Inc., facility appears on the LUST listing and may possibly pose an adverse impact to the site. No recognized environmental conditions were noted at the site during our assessment.

We have performed an Initial Site Assessment in conformance with the scope and limitations of the California Department of transportation (Caltrans) ISA Guidelines of the proposed Fulkerth Road & SR 99 interchange project (site). Any exceptions to, or deletions from, this practice are described in Section 8, Limitations, of this report. No recognized environmental conditions were noted in association with the site during our assessment. The following items are noted:

- Irrigation features were noted at the eastern edge of the southernmost parcel of the site. Although the presence of these features is not anticipated to pose an adverse impact to the site, their nature should be confirmed and features should be appropriately destroyed prior to site development.
- Portions of the site have been used for agricultural purposes since the 1940s. The application of agricultural chemicals, including but not limited to herbicides and pesticides, is anticipated to have occurred at portions of the site that have been historically farmed. The routine and appropriate application of agricultural chemicals is not considered a recognized environmental condition. The condition of soils at areas of the site formerly used for agricultural purposes, including areas that may have been used for the storage, mixing, or rinsing of containers of agricultural chemicals, is not known, and was beyond the scope of our assessment. Further assessment of the presence of persistent agricultural chemical residues, if desired, would require the collection and analysis of soil samples from the site.
- Fulkerth Road has existed since at least 1916, and SR 99 has existed since at least 1972 in its current location. Commercial distribution and use of leaded gasoline was common before 1973, but has been restricted in use by the US EPA since the mid- 1970s. Aerially deposited lead, generated from the emissions of vehicles fueled by leaded gasoline, may be present within exposed soils adjacent to Fulkerth Road and SR 99. The assessment of the presence and extent of soils impacted by aerially deposited lead was beyond the scope of our assessment.

Findings of Kleinfelder's assessment are discussed in greater detail in Chapter 7 of this report. This report is subject to the limitations in Chapter 8.

2. INTRODUCTION

The purpose of this assessment is to assist the client in evaluating recognized environmental conditions at the site. Kleinfelder performed this Initial Site Assessment (ISA) in general accordance with the scope and limitations of the Caltrans Initial Site Assessment guidelines, from Chapter 5 “Hazardous Waste Site Investigations” of the Caltrans Project Development Procedures Manual. The ISA scope of work is similar to the American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-05)*. A recognized environmental condition is defined by the ASTM standard as “the presence or likely presence of hazardous substances or petroleum products under conditions that indicate a release into structures on the property or into the ground, groundwater or surface water of the property.”

Report Format

The following sections describe Kleinfelder’s work scope:

- Chapter 3, **Site Setting**, is a compilation of information concerning the site’s location, physical setting, and geologic and hydrogeologic conditions.
- Chapter 4, **Records Review**, is a compilation of Kleinfelder’s review of several databases available from the Federal, State, and local regulatory agencies regarding hazardous substance use, storage, or disposal at the site; and for off-site facilities up to a mile radius from the site. This chapter includes interviews and telephone conversations conducted by Kleinfelder with local regulatory personnel knowledgeable about the site.
- Chapter 5, **History of the Site**, summarizes the history of the site and adjoining properties based on various sources which may include a review of aerial photographs, city or suburban directories, interviews, historical maps, chain-of-title, and information provided to Kleinfelder by the client.
- Chapter 6, **Site Reconnaissance**, describes Kleinfelder’s site observations during the site reconnaissance and observations of adjacent parcels.

- Chapter 7, **Findings and Conclusions**, is a presentation of our findings and conclusions regarding the information in Chapters 3 through 6; and presents our opinion regarding the presence of environmental conditions of concern at the site. Data gaps in historical or regulatory agency research and their significance to the conclusions of the Phase I ISA are presented.
- Chapters 8 and 9 present our **Limitations** and **References**, respectively.

Pertinent documentation regarding the site is included in Appendices A through C of this report.

3. SITE SETTING

The site setting is presented to assess the significance of potential on- and off-site contaminant migration, if present. The site location is presented on Plate 1 (Vicinity Map) and on Plate 2 (Site Plan) in Appendix A. Tables 1 through 3 provide the physical characteristics of the site and bordering properties.

3.1 Physical Setting

The information presented in Table 1 describes the physical location of the site. This information was obtained from maps, public records, and interviews.

**TABLE 1
SITE SETTING**

CURRENT ASSESSOR'S PARCEL NUMBERS, ADDRESSES, and CURRENT USE	088-010-019 – 2701 Fulkerth Road 089-020-019 (portion of) – 2618 Fulkerth Road 089-019-019-0 Highway 99
LOCATION	The intersection of SR 99 and Fulkerth Road in Turlock, California
TOWNSHIP & RANGE	Portion of the south ½ of section 9 and the north ½ of section 16, Township 5 South, Range 10 East
CURRENT USE	Vacant land
PROPOSED USE	Freeway interchange

Table 2 presents information about the physical setting of the site. This information was obtained from published maps.

**TABLE 2
PHYSICAL SETTING**

USGS TOPOGRAPHIC QUADRANGLE	Ceres, CA Quad 1963 photorevised 1987	The site is located in a rural area with relatively flat topography at an elevation of 95 feet above mean sea level. Fulkerth Road is depicted as an underpass below SR 99. A small structure is depicted at or adjacent to the site, on the south side of Fulkerth Road.
GEOLOGIC MAP	San Francisco-San Jose Sheet	Quaternary Modesto Formation deposits
SOIL TYPES	Dinuba sandy loam	Moderately well-drained fine soil. Moderate infiltration rates with intermediate water holding capacity.
OIL AND GAS FIELDS	California Division of Oil and Gas Maps	According to map page W5-3, there are no oil or gas wells located on-site or within one half mile of the site.

Information on the regional geology and hydrogeology is presented on Table 3. This information was obtained from published data and maps, interviews with public agencies knowledgeable about the site, and from previous investigations conducted by Kleinfelder in the vicinity of the site.

**TABLE 3
REGIONAL GEOLOGY AND HYDROGEOLOGY**

REGIONAL GEOMORPHIC PROVINCE	The site is located in the Great Valley Geomorphic Province consisting of marine and continental sedimentary rocks resting on a basement complex of metamorphic and igneous rocks. Surficial deposits are derived from the Sierra Nevada to the east and Coast Range to the west.
DEPTH TO GROUNDWATER (Source: Department of Water Resources, Spring 2005)	Groundwater has been reported at approximately five to fifteen feet below ground surface in the vicinity of the site.
GROUNDWATER FLOW DIRECTION (Source: DWR)	Current maps indicate groundwater flow to the west. However, review of a regulatory file, for a nearby facility, indicated groundwater flow direction northwest.
REGIONAL GROUNDWATER QUALITY PROBLEMS (Source: EDR Report)	None reported

A brief drive-by survey of the parcels adjacent to the site was conducted on the same day as the site reconnaissance. A summary of the surrounding properties is presented on Table 4.

**TABLE 4
SURROUNDING PROPERTIES**

NORTH	Highway 99
SOUTH	Orchard
EAST	Highway 99
WEST	089-019-019-vacant land, portion of 089-019-020-vacant land

4. RECORDS REVIEW

4.1 Regulatory Agency Database Review

The purpose of the records review is to obtain and review records that would help to evaluate recognized environmental conditions in connection with the site and bordering properties.

Federal, state and local regulatory agencies publish databases or "lists" of businesses and properties that handle hazardous materials or hazardous waste, or are the known location of a release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. Kleinfelder contracted with a commercial database service, Environmental Data Resources (EDR), to review the regulatory agency lists for references to the site and any listings within the appropriate ASTM minimum search distances to the site. The EDR database search results are included in Appendix B, EDR ASTM Search. Table 5 summarizes the federal and state databases reviewed by EDR.

**TABLE 5
RECORDS REVIEWED-SEARCH DISTANCE**

LIST	SEARCH RADIUS	FINDINGS
FEDERAL		
NPL	1-mile	None listed
CERCLIS	½ mile	None listed
RCRA-TSD	1-mile	None listed
RCRA-GEN	Site & bordering	One listed
ERNS	Site	None listed
CORRACTS TSD	1-mile	None listed
Non-CORRACTS TSD	½ mile	None listed
STATE		
BEP/AWP/ <i>EnviroStor</i>	1-mile/1/4 mile	Four listed
SWIS	½ mile	None listed
LUST	½ mile	Five listed
SLIC	½ mile	Two listed
UST	Site & bordering	None Listed
CORTESE	¼ mile	One listed

The site does not appear on regulatory agency lists researched.

Orphan Summary/Unmapped Sites Report

Due to poor or inadequate address information, several properties could not be mapped by EDR. These properties were included in an orphan summary/unmapped properties report, which was reviewed by Kleinfelder. The orphan summary/unmapped properties report was reviewed to assess the potential for off-site properties to affect the site. Because they have incomplete addresses, these properties are not practically reviewable as defined by the ASTM standard. However, based upon the street names and Kleinfelder's knowledge of the area, none of the orphan properties appear to be within the appropriate minimum search distances discussed under the section above.

Discussion of Agency Records for the Site

Local Agency Records

Local regulatory agencies were contacted for reasonably ascertainable and practically reviewable information regarding recognized environmental conditions present at facilities in the area of the site. A summary of information obtained is provided on Table 6 and discussion follows:

**TABLE 6
AGENCY RECORDS SUMMARY**

AGENCY	CONTACT NAME	TYPE OF INFORMATION
Stanislaus County Assessor's Office	Receptionist and Web site	Assessors parcel map included in Appendix C. Appraisal records were not reviewed, as authorization to review these records was not provided by the respective property owners.
City of Turlock Building and Safety Division	Clerk	Buildings permit records. No records were on file.
Stanislaus County Building Department	Clerk	Buildings permit records. No records were on file.
Stanislaus County Environmental Health Services	File Clerk	Information concerning hazardous material usage and USTs investigations and permits. No records were on file for the site address.

Stanislaus County Assessors Office

According to Stanislaus County Assessor's Office records, the portion of site, identified by APNs 088-010-019 and 089-019-019 is owned by the City of Turlock. The remaining portion of site, identified by APN 089-019-202, is owned by Turlock Real Estate Investors 1, LLC. Appraisal records were not reviewed, as authorization to access these records was not provided by the property owner.

Copies of APN maps for the site parcels have been included in Appendix C.

Federal Lists

CERCLIS Properties

The CERCLIS database contains information on potentially hazardous waste sites that have been reported to the EPA pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, a.k.a., the Superfund program). There were no CERCLIS properties located within one-mile of the site.

NPL Properties

The National Priorities List (NPL) includes sites that the United States Environmental Protection Agency (EPA) considers threats to public health and the environment, and for which Superfund monies have been allocated. The NPL list is derived from the CERCLIS List and identifies over 1,200 sites for priority cleanup under the Superfund program. The list is primarily based on a score that the site receives from the EPA's Hazard Ranking System. There were no NPL properties located within one-mile of the site.

RCRA CORRACTS TSD Properties

The EPA maintains a database of Resource Conservation and Recovery Act (RCRA) facilities that are undergoing "corrective action." A "corrective action order" is issued pursuant to RCRA Section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA. This portion of EPA's RCRA database contains information on Treatment, Storage or Disposal (TSD) facilities with corrective action activity. There are no RCRA CORRACTS TSD facilities located on or within one-mile of the site.

RCRA non-CORRACTS TSD Properties

This portion of the RCRA database lists TSD facilities that are not currently under corrective action order. There were no TSD facilities located within one-mile of the site.

RCRA Generators

The portion of the RCRA database contains information on reporting facilities that generate hazardous wastes as defined by the RCRA. There is one RCRA Generator facility located adjacent to the site.

- The Turlock Auto Plaza, facility is located adjacent west of the site at 1600 Auto Mall Drive. The EDR report indicates this facility is classified as a RCRA small quality generator, and did not note any violations. However, this facility is not anticipated to pose an adverse impact to the site, due to its current regulatory status.

ERNS

The Emergency Response Notification System (ERNS) is a national database that contains information from spill reports made to federal authorities including the EPA, the United States Coast Guard, the National Response Center and the Department of Transportation. This reporting system contains preliminary information on specific releases, including spill location, substance, and responsible party. There are no ERNS hazardous materials incidents listed for the site or adjacent properties.

State Lists

BEP/AWP/EnviroStor Properties Cal-EPA maintains a database of potentially hazardous waste facilities identified as the *Cal-Sites* list. These sites are identified through the historical Abandoned Site Survey Program and federal, state, and county funded site evaluation programs. The *Cal-Sites* list also includes both the Annual Workplan (AWP) and Bond Expenditure Plan (BEP) sites. The Department of Toxic Substances Control maintains the EnviroStor database, formerly CalSites. There are four AWP, BEP, or Enviorstor properties located within one and one-quarter miles of the site.

- The U.S. Rentals facility is located approximately .35 miles northeast of the site at 2800 North Golden State Boulevard and will be discussed as a LUST listing later in this report.
- The Conagra Frozen Foods facility is located approximately .8 miles south of the site at 107 South Kilroy Road. The EDR report indicates that Stanislaus County determined that the cleanup of the facility had occurred August 1, 1984. The

Conagra Frozen Foods facility is not anticipated to pose an adverse impact to the site, due to its regulatory status and distance from the site.

- The John H. Pitman High School facility is located approximately 1.2 miles north of the site at 2631 West Zeering Road. This facilities status is listed as “no further action”. The John H. Pitman High School facility is not anticipated to pose an adverse impact to the site, due to its regulatory status and distance from the site.
- The Alternative Education School facility is located approximately .7 miles south of the site at 400 Dianne Drive. This facility’s status is listed as “inactive”. The Alternative School facility is not anticipated to pose an adverse impact to the site, due to its regulatory status and distance from the site.

Regional Water Quality Control Board SLIC list

The California Regional Water Quality Control Board - Central Valley Region (RWQCB) maintains a list of spills, leaks, incidents and complaints (SLIC) that have been reported within their jurisdiction. There are two SLIC properties located within a half-mile of the site.

- The Golden State Utility Company facility is located approximately .21 miles northeast of the site at 2007 W. Tuolumne Road. The State Water Resources Control Board GeoTracker web site indicates that this facility is an open case. Currently this facility is undergoing site assessment. The Golden State Utility Company facility is not anticipated to pose an adverse impact to the site, due to its distance and direction from the site.
- The U.S. Rentals facility is located approximately .35 miles northeast of the site at 2800 North Golden State Boulevard and will be discussed as a LUST listing later in this report.

LUST Properties

The RWQCB maintains records of reported leaking underground storage tank (LUST) incidents. The RWQCB is required to submit an annual report to the state that covers the reported leaks of hazardous substances from underground storage tanks. There are five LUST properties located within one-half mile of the site.

- The Gary Olson Trucking facility is located approximately .22 miles north-east of the site at 2119 Tuolumne Road. The State Water Resources Control Board GeoTracker web site and the EDR report indicates that this facility was issued a case closed letter by the RWQCB on January 2, 2003. This facility is not anticipated to pose an adverse impact to the site due to its regulatory status and direction from the site.
- The U.S. Rentals facility is located at 2800 Golden State, approximately .30 miles northeast of the site. The State Water Resources Control Board GeoTracker web site and the EDR report indicates that this facility was issued a case closed letter by the RWQCB on January 31, 1995. This facility is not anticipated to pose an adverse impact to the site due to its regulatory status and distance from the site.
- The Miller Manufacturing facility is located at 2032 Divanian Drive, approximately .45 east of the site. The State Water Resources Control Board GeoTracker web site and the EDR report indicates that this facility has been issued a case closed letter by the RWQCB, dated September 24, 1993. This facility is not anticipated to pose an adverse impact to the site due to its regulatory status and distance from the site.
- The B&C Shop & Equipment facility is located at 1301 Fulkerth Road, approximately .50 miles east of the site. The State Water Resources Control Board GeoTracker web site and the EDR report indicates that this facility was issued a case closed letter by the RWQCB on June 28, 2002. This facility is not

anticipated to pose an adverse impact to the site due to its regulatory status and distance from the site.

- The Joe Gomes & Sons Inc. facility is located approximately .30 miles southeast of the site at 725 North Tully Road. The State Water Resources Control Board GeoTracker web site and EDR report indicate that this facility is an open case. Based on the GeoTracker database information this facility is undergoing remediation. MTBE has been identified at elevated concentration in the current down gradient direction, which appears to toward the site. Additional monitoring wells have been recommended, by the consultant, to define the lateral extent of impacted groundwater. Impacts to site groundwater, from this facility are possible, and have not been evaluated.

UST (Hazardous Substance Storage Container Database) Properties and Facility Inventory Database

The Hazardous Substance Storage Container database, the Statewide Environmental Evaluation and Planning Systems (SWEEPS), and the Facility Inventory Database (FID) are historical listings of underground storage tank (UST) sites maintained by the State Water Resources Control Board. More recent information is obtained by contacting the local regulatory agency that regulates USTs. The site and adjacent properties do not appear on the State of California Historical UST, SWEEPS, or FID Lists.

Cortese Properties

The Office of Environmental Protection, Office of Hazardous Materials maintains the Identified Hazardous Waste and Substances Site database also known as the Cortese list. This database identifies contaminated public drinking water supply wells, sites selected for remediation, sites with known toxic releases, UST sites with reported releases, and solid waste disposal facilities where contamination migration is known. There is one Cortese property located within one half-mile of the site. The Gary Olson

Trucking facility is listed in the Cortese database and was previously discussed as LUST listing in this report.

SWIS/LF Properties

The California Integrated Waste Management Board maintains a database of active, inactive and closed landfills, and transfer and composting stations. There are no SWIS/LF listed properties on or within a half-mile of the site.

5. HISTORY OF THE SITE

The history of the site was researched to identify obvious uses of the site from the present to first developed use, or back to the earliest readily available resources. Table 7 summarizes the availability of information reviewed during this assessment.

**TABLE 7
HISTORICAL INFORMATION REVIEWED**

	Years reviewed	Availability
AERIAL PHOTOGRAPHS	1937, 1950, 1957, 1972, 1982, 1987, 1998, 2005	EDR, Stanislaus County
TOPOGRAPHIC MAPS	Ceres California 7.5 Quad., 1916, 1953, 1969, and 1969, photo-revised 1976, 1961 photo-revised 1987	EDR
SANBORN FIRE INSURANCE MAPS	None available	EDR
CITY DIRECTORIES	1964 - 2008	EDR
INTERVIEW / QUESTIONNAIRE		An interview with the owner of the property was not conducted as contact information was not provided.

The site history was established by utilizing historic topographic maps, aerial photographs, and building department records.

Topographic Maps and Aerial Photographs

The 1916 topographic map depicts the site as vacant and undeveloped. No structures are visible. An unnamed roadway extends through the site in an east-west direction.

The 1937 and 1950 aerial photographs depict the site planted in field crops. A structure is visible on the site. Fulkerth Road extends through the central portion of the site. Surrounding properties are occupied by field crops and farm related buildings.

The 1953 topographic map depicts a structure at the site. Conditions at surrounding properties are similar to those noted on the 1916 topographic map and the 1937 and 1950 aerial photographs.

Conditions at the site and surrounding properties on the 1957 aerial photograph and 1969 topographic map appear similar to those noted on the 1937 and 1950 aerial photographs.

The 1972 aerial photograph depicts SR 99 extending along the eastern border of the site. The previously noted structure is west of SR99, along Fulkerth Road. The remainder of the site appears vacant. Surrounding properties include field crops and farm structures.

The 1976 topographic map also shows SR 99 extending along the eastern border of the site. A structure and orchard are depicted to the west of SR 99 along Fulkerth Road at the site.

The 1982 and 1987 aerial photographs and the 1987 topographic map indicate conditions at the site similar to those previously discussed in 1972 aerial photograph. Increased development is noted on the surrounding properties east of SR 99.

The structures previously noted on the site are no longer visible on the 1998 and 2005 aerial photographs. Surrounding properties indicate increased development west of SR 99. Commercial development is noted northwest of the site and northeast of SR 99.

City Directories

A search of City of Turlock Polk Directories dated 1964 to 2008 for the site addresses, was conducted by EDR. Following is a summary of occupant listings of occupants for the site addresses:

Address	Occupant	Dates
2701 Fulkerth Street	Not listed	1964-2008
2618 Fulkerth Street	Not Listed Vacant Residence Not Listed	1964-1669 1970-1974 1975-1991 1992-2008
0 Hwy 99	Not listed	1964-2008

Interviews

An interview with the current property owners was not conducted as contact information was not provided.

6. SITE RECONNAISSANCE

A representative from Kleinfelder, Mr. Terry Nephew, conducted a site reconnaissance on February 17, 2009, to assess and photograph present site conditions. The site boundaries are shown on Plate 2, "Site Plan," and photographs of the site are attached. A brief site description and readily apparent environmental conditions that were observed during the site reconnaissance are summarized below.

The site currently covers approximately 10-acres and is undeveloped land adjacent to State Route 99, with Fulkerth Road crossing the site, near the center, running in an east to west direction. A portion of the site is adjacent to and east of automobile dealerships known as the Turlock Auto Center. The shapes of the parcels that make up the site are triangular (north of Fulkerth Road) and slightly trapezoid shaped (south of Fulkerth). There are no structures located on the site. The southern-most parcel has been recently graded. There is storm water drainage along the eastern boundary of the site adjacent to State Route 99. There are also irrigation water delivery gates along the eastern edge of the southern-most parcel. A TID irrigation canal delivery culvert is located at the northeast and southeast corner of the two southern parcels. A gasoline AST and a diesel AST were noted at the automobile dealership adjacent and west of the site. The ASTs were located within a cement berm on a concrete pad. No free product or staining was noted on the concrete. An area of burned vegetation debris, believed to be from a recent grading of a portion of the site, was noted near the center of the southern parcels. Based on the material noted in the burned debris, this should not impact the site.

During the site reconnaissance, observations and conditions likely to be associated with environmental concerns, as described in ASTM standards, were noted and summarized on Table 8.

**TABLE 8
SITE OBSERVATIONS**

7. FINDINGS AND CONCLUSIONS

Kleinfelder performed this ISA of the site in conformance with the scope and limitations of ASTM Practice E1527-05. In summary:

7.1 History

The site has been used for agricultural purposes, such as field crops, since at least 1937. A residence was also located at the site from at least the 1937 until 1987. SR 99 was constructed along the eastern border the site between 1969 and 1972. No USTs or hazardous materials releases were reported at the site. No other land use has been reported.

7.2 Site Reconnaissance

The site consists of approximately ten acres of vacant land. Irrigation features were noted at the eastern edge of the southernmost parcel. Fulkerth Road runs through the site from east to west, near the center. SR99 borders the site to the east. Gasoline and diesel AST's were noted, within a berm on the Auto property adjacent and to the west of the site. An area of burned vegetation debris, believed to be from a recent grading of a portion of the site, was noted near the center of the southern parcels. No additional uses of the site were noted during our assessment.

7.3 Regulatory Review

No records were noted at the regulatory agencies contacted suggesting the presence of USTs, hazardous materials handling, storage, or releases at the site. The Joe Gomes & Sons Inc., facility appears on the LUST listing and may possibly pose an adverse impact to the site.

7.4 Conclusions

We have performed an Initial Site Assessment in conformance with the scope and limitations of the CalTrans ISA Guidelines of the proposed SR 99 & Fulkerth Road interchange project (site). Any exceptions to, or deletions from, this practice are described in Section 8, Limitations, of this report. No recognized environmental conditions were noted in association with the site during our assessment. The following items are noted:

- Irrigation piping features were noted at the eastern edge of the southernmost parcel of the site. Although the presence of these features is not anticipated to pose an adverse impact to the site, their nature should be confirmed and features should be appropriately destroyed prior to site development.
- Portions of the site have been used for agricultural purposes since 1937. The application of agricultural chemicals, including but limited to herbicides and pesticides, is anticipated to have occurred at portions of the site that have been historically farmed. The routine and appropriate application of agricultural chemicals is not considered a recognized environmental condition. The condition of soils at areas of the site formerly used for agricultural purposes, is not known, and was beyond the scope of our assessment.
- Fulkerth Road has existed since at least 1916, and SR 99 has existed, in its current location, since at least 1972. Commercial distribution and use of leaded gasoline was common before 1973, but has been restricted by the US EPA since the mid 1970s. Aerially deposited lead, generated from the emissions of vehicles fueled by leaded gasoline, may be present within exposed soils adjacent to Hosking Road and Highway 99. The assessment of the presence and extent of soils impacted by aerially deposited lead was beyond the scope of our assessment.

7.5 Data Gaps

Following is a discussion of data gaps documented during the course of our assessment, with their potential impact upon the conclusions of this Phase I ISA:

- Interviews with owners of the site parcels were not conducted. However, considering the findings of the historical and regulatory agency records research, the lack of owner interviews for these parcels is not anticipated to have a significant impact to the findings of our assessment.

8. LIMITATIONS

Initial Site Assessments (ISAs) are non-comprehensive by nature and are unlikely to identify all environmental problems or eliminate all risk. The attached report is a qualitative assessment. Kleinfelder offers a range of investigative and engineering services to suit the needs of our clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations yield more information, which may help you understand and better manage your risks. Since such detailed services involve greater expense, we ask our clients to participate in identifying the level of service that will provide them with an acceptable level of risk. Please contact the signatories of this report if you would like to discuss this issue of risk further.

Kleinfelder performed this environmental assessment in general accordance with the guidelines set forth in the Caltrans Initial Site Assessment guidelines, from Chapter 5 "Hazardous Waste Site Investigations" of the Caltrans Project Development Procedures Manual, in accordance with generally accepted standards of care practiced by other members of our profession in Stanislaus County, California at the time the work was completed, and subsequently approved by you as our client. Environmental issues not specifically addressed in the report were beyond the scope of our work and not included in our evaluation.

This report may only be used by Omni-Means, Ltd., and only for the purposes stated, within a reasonable time from its issuance, but no more than one (1) year from the date of the report. All information gathered by Kleinfelder is considered confidential and will be released only upon written authorization of Omni-Means, Ltd, or as required by law. Non-compliance with any of these requirements by Omni-Means, Ltd, or anyone else, unless specifically agreed to in advance by Kleinfelder in writing, will release Kleinfelder from any liability resulting from the use of this report by any unauthorized party and

Omni-Means, Ltd, agrees to defend, indemnify, and hold harmless Kleinfelder from any claim or liability associated with such unauthorized use or non-compliance.

It should be recognized that definition and evaluation of geologic and environmental conditions are a difficult and inexact science. Judgments leading to conclusions and recommendations are generally made with incomplete knowledge of the subsurface conditions present. Acceptance of this report will indicate that Omni-Means, Ltd, the has reviewed the document and determined that it does not need or want a greater level of service than provided.

Regulations and professional standards applicable to Kleinfelder's services are continually evolving. Techniques are, by necessity, often new and relatively untried. Different professionals may reasonably adopt different approaches to similar problems. As such, our services are intended to provide Omni-Means, Ltd, with a source of professional advice, opinions, and recommendations. Our professional opinions and recommendations are based on our research activities limited by the scope of work, in accordance with the generally accepted consulting practice that exists at the time and may depend on, and be qualified by, information gathered previously by others and provided to Kleinfelder. Consequently, no warranty or guarantee, express or implied, is intended or made.

Land use, site conditions (both on-site and off-site) and other factors will change over time. Since site activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings and opinions can be considered valid only as of the date of the site visit. This report should not be relied upon after 180 days from the date of its issuance.

ASTM Standard E1527-05 requires additional user responsibilities and continuing obligations on the part of the report user, including but not limited to the assessment of comparative fair market property values of the site (if the property was not affected by hazardous substances or petroleum products, Section 6.5), environmental clean-up liens beyond land title records (Section 6.2), and specialized knowledge of the property by the users of a Phase I ISA (Section 6.3).

10. QUALIFICATIONS

Kleinfelder is an engineering firm with Engineers, Geologists, and Class I & II Environmental Assessors registered by the Office of Environmental Health Hazard Assessment in California. Kleinfelder is qualified to perform the environmental assessments in accordance with the guidelines of ASTM E1527-05, Standard Practice for Environmental Site Assessment Process.

The Environmental professionals responsible for preparing this report are as follows:

KATHLIEN CHILDERS

Ms. Childers has nine years of experience in the environmental discipline. She has worked on numerous multi-disciplined projects including regulatory compliance, water assessments, Phase I ESA, and waste management issues. Her project experience includes municipal, (local, state, federal, and tribal), industrial, agricultural, and school sites.

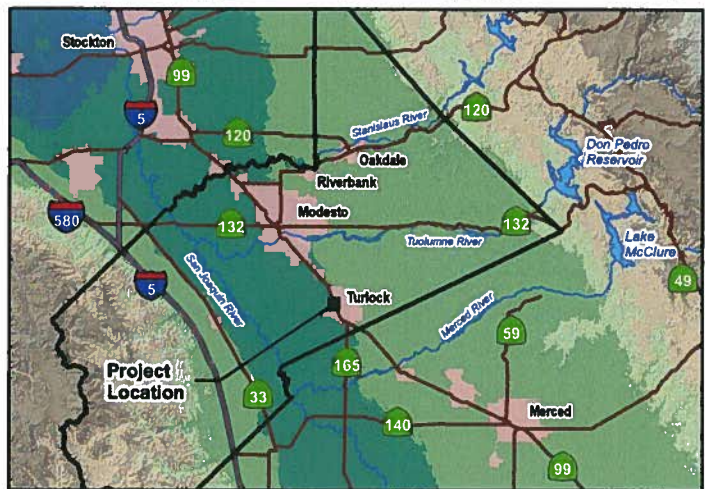

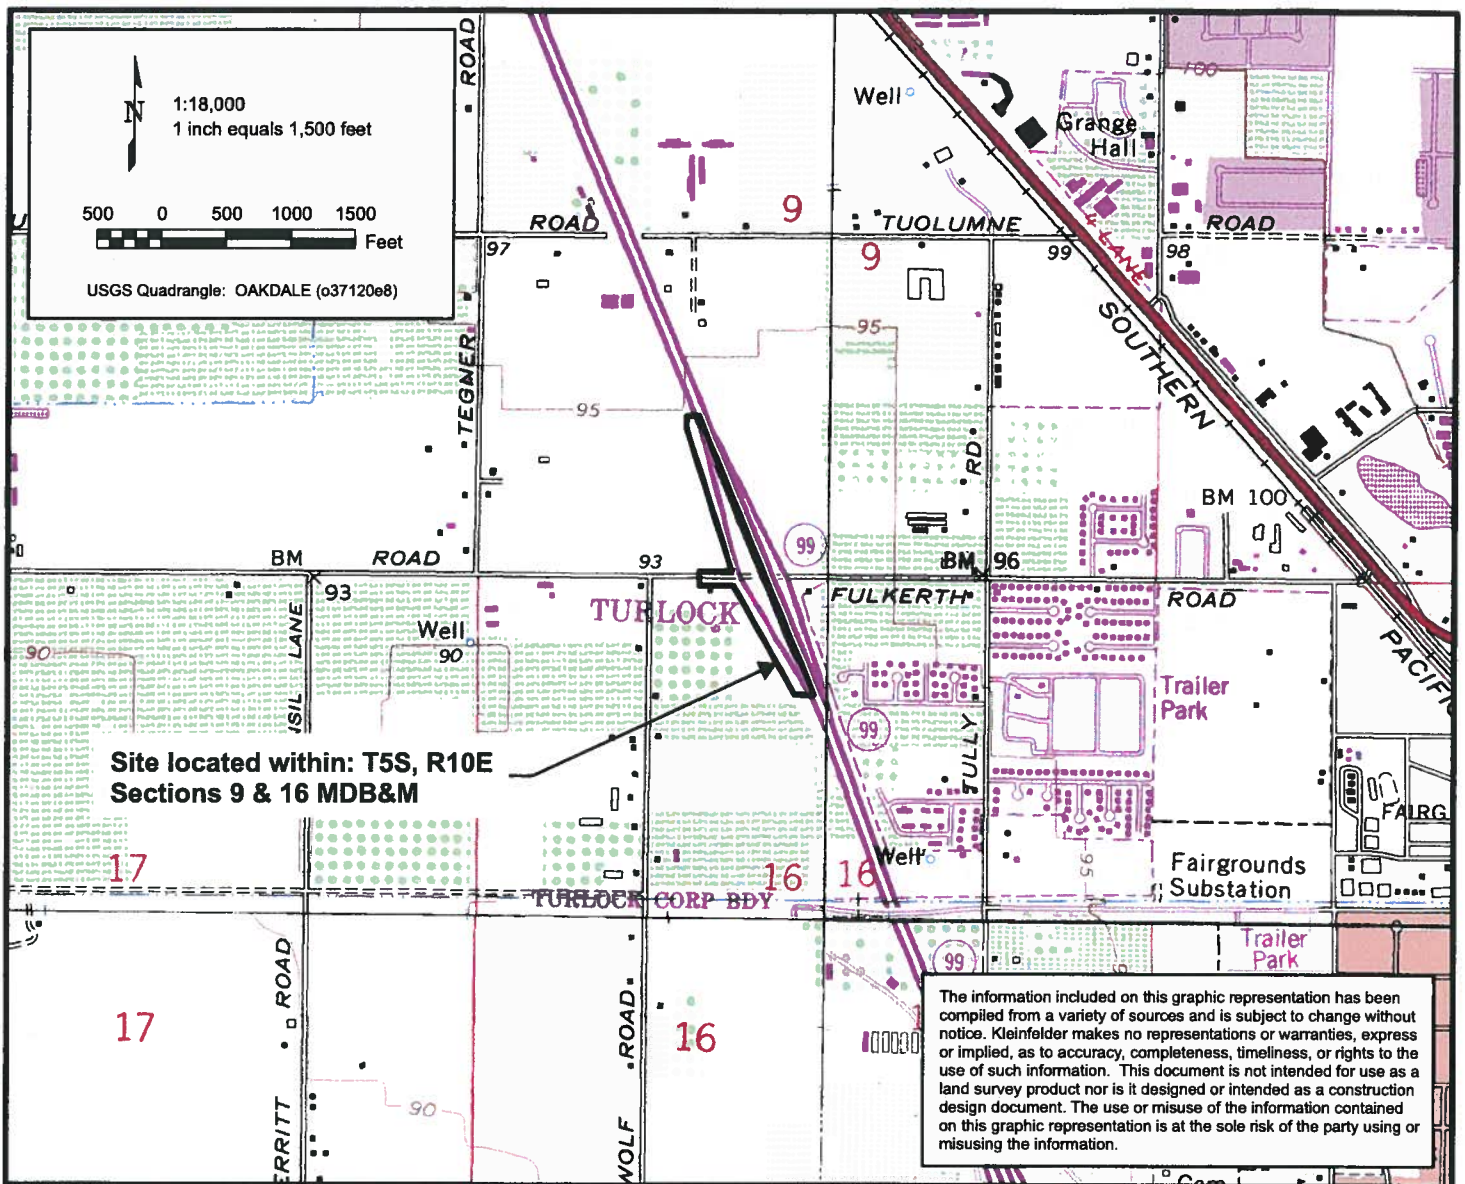

JASON R. PAUL

Mr. Paul has eighteen years of experience in the environmental discipline. He has worked extensively as client liaison with various regulatory agencies and has strong project management skills in working with both public and private sector clients. He has managed and conducted work on numerous soils and groundwater investigation and remediation projects, Phase I Environmental Site Assessments (ESAs), Preliminary Endangerment Assessments, and Risk Assessments. His project experience includes municipal, industrial, agricultural, public utility, commercial, military, and school sites. Mr. Paul's project management responsibilities include formulation of environmental assessment work plans, regulatory agency liaison, supervision of drilling operations, preparation of groundwater sampling and laboratory analysis programs for environmental clients, and supervision of field staff.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Manufactured Gas Plants..... EDR Proprietary Manufactured Gas Plants

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/10/2008 has revealed that there are 4 RCRA-SQG sites within approximately 0.5 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/31/2007 has revealed that there are 2 ERNS sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 11/25/2008 has revealed that there is 1 RESPONSE site within approximately 1.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/25/2008 has revealed that there are 4 ENVIROSTOR sites within approximately 1.25 miles of the target property.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 11 SWEEPS UST sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 12/31/2007 has revealed that there is 1 CHMIRS site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported Date Completed: 20-DEC-89	W/TOLUMNE / TULLY	N 1/8 - 1/4 (0.230 mi.)	19	22

Other Ascertainable Records

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 12/31/2007 has revealed that there is 1 FUDS site within approximately 1.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
TURLOCK REHABILITATION CENTER		E 1/2 - 1 (0.657 mi.)	42	50

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 10/30/2008 has revealed that there is 1 FINDS site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
TURLOCK AUTO PLAZA	1600 AUTO MALL DR	0 - 1/8 (0.000 mi.)	C6	11

EXECUTIVE SUMMARY

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites). This listing is no longer updated by the state agency.

A review of the Cortese list, as provided by EDR, and dated 04/01/2001 has revealed that there are 5 Cortese sites within approximately 0.75 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
GARY OLSON TRUCKING	2119 TUOLUMNE RD	NNE 1/8 - 1/4 (0.217 mi.)	E18	22
JOE GOMES AND SONS INC	725 N TULLY RD	SSE 1/4 - 1/2 (0.299 mi.)	21	25
MILLER MANUFACTURING	2032 DIVINIAN DR	E 1/4 - 1/2 (0.451 mi.)	K38	45
U.S. RENTALS	2800 GOLDEN STATE BLVD	N 1/4 - 1/2 (0.473 mi.)	39	45
B&C SHOP & EQUIPMENT	1301 FULKERTH RD	E 1/4 - 1/2 (0.500 mi.)	41	49

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2006 has revealed that there are 7 HAZNET sites within approximately 0.25 miles of the target property.

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown
Mixed waste (haz. and radioactive): Unknown
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: Unknown
Furnace exemption: Unknown
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Violation Status: No violations found

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

1004676592

MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D009

Waste name: MERCURY

Waste code: D016

Waste name: 2,4-D

Waste code: D018

Waste name: BENZENE

Waste code: D035

Waste name: METHYL ETHYL KETONE

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

FUDS Description Details:

Site is located 15 mi SE of Modesto and 20 mi NW of Merced, in the city of Turlock. S area of site is occupied by a cemetery, agriculture land & low income housing. The S portion of site is occupied by the Turlock Irrigation District as a substation & material storage area. The northernmost tracts are presently occupied by light industrial bldgs, including a cement manufacturer & a scrap metal yard.

FUDS History Details:

During 1943 & 1944, the US acquired fee title to 19.27 ac of land by a Declaration of Taking. During the same period obtained leases for a total 111.81 ac of land & obtain leases for a total of 111.81 ac of land & obtain fee titles for easements for a total of 0.333 of an ac of land. Total acquisition was 131.41 ac. Site was acquired by the War Dept in 1943 & 1944 for a Japanese American receiving center & internment camp. Improvements included barracks, latrine, laundry, septic systems, and bldgs

FUDS Current Program Details:

During 1943 & 1944, the US acquired fee title to 19.27 ac of land by a Declaration of Taking. During the same period obtained leases for a total 111.81 ac of land & obtain leases for a total of 111.81 ac of land & obtain fee titles for easements for a total of 0.333 of an ac of land. Comments: Certified. Jim Simpson of the Stanislaus County Department of Environmental Resources has made an inspection of the facility and determined the cleanup has taken place. Surveillance and Enforcement had been in contact with Karen Goassel of the Environmental Protection Agency who is coordinating a followup inspection of Banquet Foods in January 1985. EPA personell will review the activities that have taken place and will obtain additional samples to confirm that a satisfactory cleanup has beenaccomplished. The Auditor General Report indicates that 7 cu yds of soil and 10 drums of material were removed. The region became aware of the site through a complaint by a citizen. August 1, 1984 was selected as the date of cleanup because it gives the earliest statute of limitations date.

Background Info: After a citizen complaint about the site, Jim Simpson (Senior Sanitarian of the Stanislaus County Dept. of Environmental Resources) inspected Banquet Foods in November of 1984. He discovered that General Electric had cement, contaminated with PCB's, removed and transported by Steve's Trucking to Kettleman Hills for disposal. Samples taken of the cement revealed PCB concentrations ranging from 20 parts per million to 55,000 parts per million. Simpson was in contact with Karen Gosell of the EPA, PCB Coordinator, who informed him that EPA planned on an inspection in January 1985.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/29/2008	Source: EPA

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/29/2008	Source: EPA
Date Data Arrived at EDR: 10/10/2008	Telephone: N/A
Date Made Active in Reports: 11/19/2008	Last EDR Contact: 01/26/2009
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/27/2009

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/07/2008	Source: EPA
Date Data Arrived at EDR: 10/16/2008	Telephone: 703-412-9810
Date Made Active in Reports: 12/08/2008	Last EDR Contact: 01/30/2009
Number of Days to Update: 53	Next Scheduled EDR Contact: 04/13/2009
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/01/2008

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 07/16/2008

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 06/15/2007
Date Made Active in Reports: 08/20/2007

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

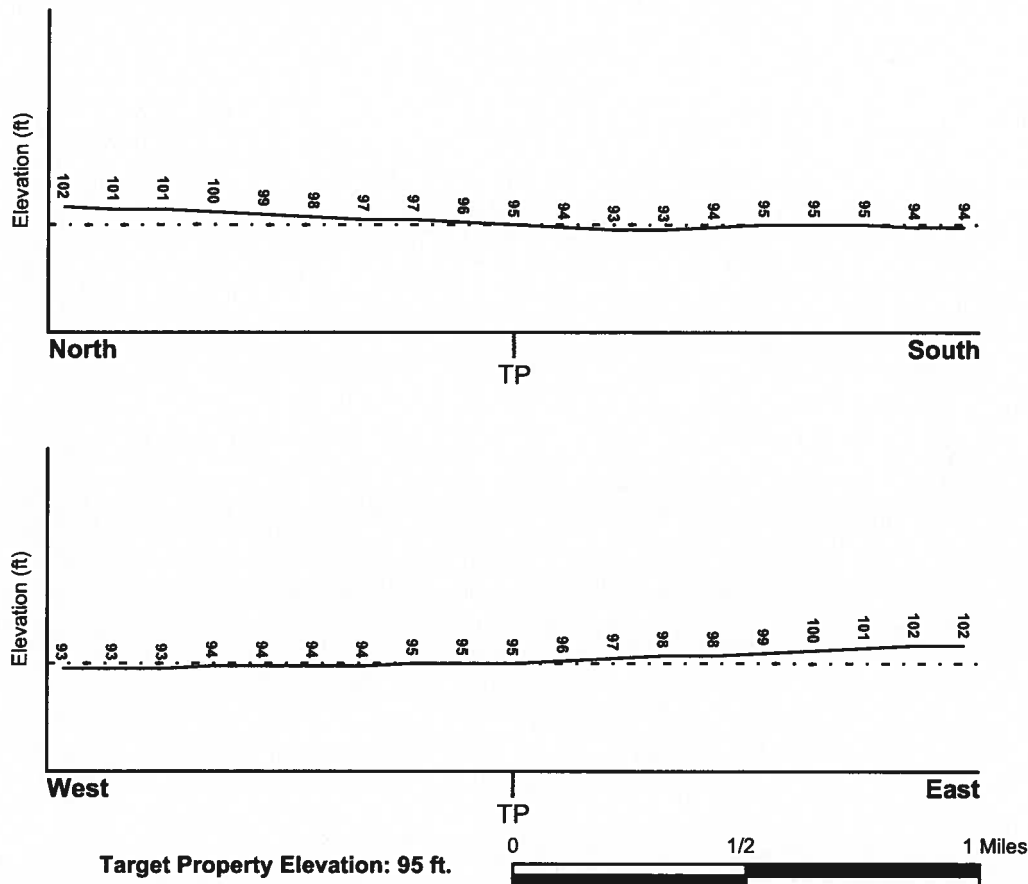

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Dinuba

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	9 inches	29 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
3	29 inches	59 inches	stratified very fine sand to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Delhi

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	9 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
