City of Turlock Access Compliance Report – Public Rights-of-Way (**Intersections**) **XXX.XXX**

Street ID#	Survey Street	Street ID#	Cross Street
XXX	ANY STREET	XXX	ANY AVENUE

Orientation	Ramp Type	Existing Access Barrier and Proposed Solution	Codes / Mitigation Info	Measurements
NW	Perpendicular			
176	Ramp Slope			

• *As-Built Description:*
Running slope of existing perpendicular curb ramp is less than 5% or greater than 8.3%.

• *As-is* Measurement: 12.8%

• *Proposed Solution:*
Demolish existing and provide new, parallel curb ramp, including detectable warning surfaces, and top and bottom landing as required.

PCODE	**PC03A**
ADAPROW	**R303.2.1.1**
CSAS	**1127B.5.3**
ADAAG	**4.7.2; 4.8.2**
Priority	1
Unit Cost	**$2,800.00**

Width of Ramp	(in)	48
Slope of Ramp	(%)	12.8
X Slope of the Ramp	(%)	0.7
Top Landing Length	(in)	48
Top Landing Slope	(%)	2.5
Top Landing X Slope	(%)	1.2
Left Flare	(%)	10.5
Right Flare	(%)	15.2
Gutter Slope	(%)	4.1
Gutter Lip	(in)	0
Grooved Borders	(in)	12
Truncated Domes		Yes
Within Crosswalk		Yes

1. Locator Number: Corresponds to the unique database record (one locator number per record).
2. Orientation: Corresponds to the specific corner/curb ramp in any given intersection, unique to each corner/curb ramp (in some cases there is more than one curb ramp per corner, or no curb ramp):
   - -NW, SW, SE, and NE are the most commonly used directions;
   - -NWN, NWS, SWN, SWS, SEN, SES, NEN, and NES identify individual curb ramps in situations involving multiple curbs ramps at one corner;
   - - I-NW, I-NE, I-SW, I-SE, etc, identify curb ramps located on medians and pedestrian refuge islands.
3. Specific Item: Category of accessible feature in which the barrier belongs.
4. Survey Street: Arterial/Primary street name with corresponding unique street identification number.
5. Ramp Type: Identifies the type of curb ramp (parallel, perpendicular, blended transition or no curb ramp, etc).
6. As-Built Description: Description of as-built barrier based on applicable accessibility codes.
7. As-is Measurement: Existing condition/dimension featured on the ramp measured as the most severe barrier on the particular ramp.
8. Proposed Solution: Description of steps necessary to remove barrier and, if applicable, an interim solution or notes.
9. Codes / Info:
   - *PCODE:* specifies the relevant SSA database code. Database code plus suffix:
   - *ADAPROW:* U.S. Access Boards proposed accessibility guidelines for pedestrian facilities in the public rights of-way.
   - *CSAS:* California State Accessibility Standards within Building Code.
   - *ADAAG:* *Americans with Disabilities Act Accessibility Guidelines.*
10. Unit Cost: Estimated cost specific solution per one unit. (The final cost of barrier removal may exceed this estimate based on the year of mitigation, design approach and chosen method of mitigation)
11. Priority Number: Number assigned to specific barrier according to prioritization criteria based on level of deviation from compliancy for all non-compliant features at a signal device. (1 = most severe and 5 = least severe).
12. Cross Street: Cross/intersecting street name with corresponding unique street identification number.
13. Ramp Features: Features of ramp measured to determine accessibility.
14. Measurements: Existing condition/dimension determined for each ramp.
    - -(in) measurement in inches
    - -(%) measurement in percentage grade
    - -Left measurements on the left side while facing the ramp
    - -Right measurements on the right side while facing the ramp
    - -BOLD text indicate non-compliant dimensions.
    - -Normal text indicate compliant dimensions

SE Blended Transition

371 Detectable Warnings

- *As-Built Description:*

Detectable warning surface not provided where a curb ramp, landing, or blended transition connects to a street.

- *Proposed Solution:*

Install a truncated dome surface that extends the full width and depth(36" min.) of the curb ramp, excluding the flared sides, inside the grooved border.

- *Notes:*

Level change where gutter meets street pavement.

796 Gutter

- *As-Built Description:*

The slope of the gutter area or street at the foot of a curb ramp or blended transition exceeds 1:20 (5%) in the direction of the pedestrian crossing.

- *As-is Measurement:* 9.3%
- *Proposed Solution:*

Demolish gutter or street area as required and provide 48" x 48" area at foot of curb ramp or blended transition with slope no greater than 5%.

SE Curb Ramp Not Provided

1472 Access Route

• As-Built Description:

Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.

• Proposed Solution:

Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.

N Parallel

1691 Ramp Landing

- *As-Built Description:*
  Cross slope at top landing of existing parallel curb ramp exceeds 2%.
- *As-is Measurement:* Left: 3.3% Right: N/A%
- *Proposed Solution:*
  Demolish existing and provide new top landing sloped at 2% max. Curb ramp to remain.

W Blended Transition

1692 Gutter

- *As-Built Description:*

The cross slope of the gutter area or street at the foot of a curb ramp or blended transition exceeds 2%.

- *As-is Measurement:* 2.2%
- *Proposed Solution:*

Demolish gutter or street area as required and provide 48" x 48" area at foot of curb ramp or blended transition with a cross slope no greater than 2%.

- *Notes:* 4" crack in left part of gutter.

E Curb Ramp Not Provided

1693 Access Route

• As-Built Description:

Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.

• Proposed Solution:

Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.
